

# Arjun A

arjun807887@gmail.com | Kerala, India | linkedin.com/in/arjun-alliyankal

## PROFESSIONAL SUMMARY

Highly motivated and detail-oriented computer science professional with experience in machine learning, data visualization, and software development.

## EDUCATION

### M.Sc. Computer Science in Computer Science

Calicut University (2024-2026)

### B.Sc. Computer Science in Computer Science

Calicut University (2024)

## EXPERIENCE

### Machine Learning Intern at CodeAlpha

Mar 2026 —

- Performed data preprocessing, feature engineering, and model building on real-world datasets using Python.
- Evaluated ML models using cross-validation and performance metrics (accuracy, F1-score, AUC).
- Worked with scikit-learn, Pandas, and NumPy across supervised learning tasks.

### Data Visualisation Job Simulation at Tata Group (Forage)

Sep 2025 —

- Created business dashboards and visual narratives from structured datasets.
- Communicated analytical findings to simulate a stakeholder presentation setting.

### Python Programming Intern at Acura Software Solutions

Mar 2024 —

- Wrote clean, modular Python code using functions, classes, and standard data structures.
- Worked with Jupyter notebooks; managed packages via pip/conda in a data science environment.

## PROJECTS

### AutoReplyPro— AI-Powered Multi-Channel ReplyAutomation

Built an end-to-end RAG-based business reply automation system. Users upload a knowledge base (PDF, DOCX, XLSX) which is indexed locally using FAISS and Sentence Transformers. When customer inquiries arrive via Telegram, WhatsApp, or Gmail, the system retrieves relevant context and uses an LLM to generate professional, on-brand responses automatically.

### Sentiment Analysis for YouTube News Comments

Built an NLP pipeline that scrapes YouTube comments on news videos and classifies public sentiment as Positive, Negative, or Neutral — providing insights into audience reactions to current news stories.

## SKILLS

Python · SQL · C · Java · Scikit-learn · TensorFlow · Keras · Neural Networks · NLTK · HuggingFace Transformers · LangChain · LangGraph · FAISS · RAG · Pandas · NumPy · Matplotlib · Descriptive & Inferential Statistics · Linear Algebra · Calculus for Optimization · Probability & Distributions · Regression · Classification · Unsupervised Learning · Model Evaluation · Agentic AI · N8n Workflow Automation · Jupyter Notebook · Git · pip/conda

## CERTIFICATIONS & COURSES

- NPTEL – Python for Data Science (Elite) — IIT Madras
  - Machine Learning A-Z: AI, Python — Udemy
  - Python Course — Kaggle
  - Basic Programming — Kaggle
-
