EDUCATION

M.Sc. Computer Science

Calicut University

2024 – 2026 (Pursuing)

B.Sc. Computer Science

Calicut University | CGPA: 7.2 / 10

Graduated April 2024

INTERNSHIPS & VIRTUAL EXPERIENCE

Machine Learning Intern

Mar 2026

CodeAlpha (Virtual Internship Program)

- Performed data preprocessing, feature engineering, and model building on real-world datasets using Python.
- Evaluated ML models using cross-validation and performance metrics (accuracy, F1-score, AUC).
- Worked with scikit-learn, Pandas, and NumPy across supervised learning tasks.

Data Visualisation Job Simulation

Sep 2025

Tata Group (Forage) – Empowering Business with Effective Insights

- Created business dashboards and visual narratives from structured datasets.
- Communicated analytical findings to simulate a stakeholder presentation setting.

Python Programming Intern

Mar 2024

Acura Software Solutions

- Wrote clean, modular Python code using functions, classes, and standard data structures.
- Worked with Jupyter notebooks; managed packages via pip/conda in a data science environment.

PROJECTS

AutoReplyPro—AI-Powered Multi-Channel ReplyAutomation

<https://github.com/arjunalliyankal/Auto-reply-pro>

Built an end-to-end RAG-based business reply automation system that enables users to upload knowledge bases (PDF, DOCX, XLSX) for local semantic indexing using FAISS and Sentence Transformers. The platform processes customer inquiries from Telegram, WhatsApp, and Gmail, retrieves relevant context, maintains shared conversation memory across channels, and generates professional, context-aware, on-brand responses using LLMs, Python, LangChain, FAISS, Sentence Transformers, RAG, Telegram API, Gmail API, LLMs, pypdf, python-docx

AI-Powered SQL Query Generator

github.com/arjunalliyankal/sqlAI

Developed an AI-native database management platform that converts natural language into executable MySQL queries using Llama 3.3 70B (Groq API), featuring interactive schema visualization, real-time query monitoring, secure query approval workflows, and live database execution with FastAPI, WebSockets, and MySQL.

TECHNICAL SKILLS

Languages: Python, SQL, C, Java

ML / DL Frameworks: Scikit-learn, TensorFlow, Keras, Neural Networks

NLP & LLM Tools: NLTK, HuggingFace Transformers, LangChain, LangGraph, FAISS, RAG

Data & Visualisation: Pandas, NumPy, Matplotlib, Descriptive & Inferential Statistics

Math Foundations: Linear Algebra, Calculus for Optimization, Probability & Distributions

ML Concepts: Regression, Classification, Unsupervised Learning, Model Evaluation, Agentic AI

Automation & Tools: N8n Workflow Automation, Jupyter Notebook, Git, pip/conda

CERTIFICATIONS & COURSES

- NPTEL – Python for Data Science (Elite) – IIT Madras (2025)
- Machine Learning A-Z: AI, Python – Udemy (2025)
- Python Course – Kaggle (2024)
- Basic Programming – Kaggle (2024)
