PROFESSIONAL SUMMARY

MSc Computer Science student with strong foundation in Python, Java, and full-stack web development. Hands-on experience in AI/ML projects through CodeAlpha internship. Proven problem-solving abilities and leadership experience as NCC Cadet. Seeking Software Developer role at top-tier tech companies to build scalable, impactful solutions.

EDUCATION

Master of Science in Computer Science

University of Calicut, VTB College, Sreekrishnapuram (2024-2026)

Bachelor of Computer Applications

University of Calicut, Mercy College, Palakkad (2021-2024)

Higher Secondary (Commerce) in Commerce

State Board of Education, Kerala (2019-2021)

SSLC

State Board of Education (2018)

EXPERIENCE

AI Virtual Internship at CodeAlpha

February 2026 — March 2026

- Developed FAQ Chatbot using Python and Django framework to automate customer support queries and improve response accuracy
- Built Real-time Object Detection and Tracking system using computer vision techniques; achieved robust tracking across multiple video frames
- Applied NLP and ML concepts to enhance chatbot intelligence, reducing manual query handling workload by automating routine support
- Received Certificate of Completion and Letter of Recommendation recognizing technical excellence and project delivery.

PROJECTS

AI-Based College Chatbot

Engineered intelligent chatbot system to handle college-related student queries automatically, reducing manual support requests. Implemented custom NLP techniques for intent recognition and response generation, improving chatbot accuracy and user satisfaction. Demonstrated strong problem-solving skills in designing practical AI solutions for accessibility improvement and operational efficiency.

Real-time Object Detection & Tracking System

Developed robust real-time object detection and tracking pipeline using computer vision techniques for video analysis. Implemented efficient frame-by-frame processing and multi-object tracking maintaining consistency across video sequences. Applied ML concepts for object classification and advanced tracking algorithms to ensure accurate, real-time detection performance.

SKILLS

Python · Java · C Programming · SQL · HTML · CSS · JavaScript · Django · Flask · React · OOP · Data Structures · Machine Learning · NLP · AI Fundamentals · DBMS · Git · GitHub · Jupyter Notebook · VS Code

CERTIFICATIONS & COURSES

- Certificate of Completion — CodeAlpha
 - Chief Minister's Student Excellence Award — Department of Higher Education, Government of Kerala
-
